## How intelligent are elephants?

Sarah - 2025-12-02 - [Comentarios \(0\)](#) - [Elefantes](#)

### Elephant cognition

is [animal cognition](#) as present in [elephants](#). Most contemporary [ethologists](#) view the elephant as one of the world's most intelligent animals. Elephants manifest a wide variety of behaviors, including those associated with [grief](#), [learning](#), [mimicry](#), [playing](#), [altruism](#), [tool use](#), [compassion](#), [cooperation](#), [self-awareness](#), [memory](#), and [communication](#).<sup>[1][2][3]</sup> They can also exhibit negative qualities such as [revenge](#) towards those perceived to have harmed them or their families. "Duncan McNair, a lawyer and founder of conservation charity Save The Asian Elephants, told *Newsweek* that ... although gentle creatures, elephants can be 'dangerous and deadly'."<sup>[4]</sup>

Evidence suggests elephants may understand [pointing](#), the ability to [nonverbally communicate](#) an object by extending their multi-purpose trunks.<sup>[5]</sup>

An elephant brain weighs around 5 kg (11 lb), which is about four times the size of a [human brain](#) and the heaviest of any [terrestrial animal](#). It has about 257 billion [neurons](#), which is about three times the number of neurons as a human brain. However, the [cerebral cortex](#), which is the major center of cognition, has only about one-third of the number of neurons as a human's cerebral cortex.<sup>[6]</sup> While elephant brains look similar to those of humans and other mammals and has the same functional areas, there are certain unique structural differences.<sup>[7]</sup>

The intelligence of elephants is described as on par with [cetaceans](#)<sup>[8][9][10][11]</sup> and various [primates](#).<sup>[9][12][13]</sup> Due to its higher cognitive intelligence and presence of family ties, researchers and wildlife experts argue that it is morally wrong for humans to kill them.<sup>[14]</sup> [Aristotle](#) described the elephant as "the animal that surpasses all others in wit and [mind](#)."<sup>[15]</sup>
